

Walk-in Coolers and Freezers

Foodservice | Refrigerated Warehouse | Refrigeration Systems

The Kolpak Difference

Kolpak walk-ins maximize energy saving performance with standard features and options like ArcticFox™ LED Lighting and Kolpak Air Shield.

As the leader in walk-in cooler and walk-in freezer manufacturing, our constant improvement and continuous concern for our customers keep us at the forefront. Our customers have grown to expect things like help on correctly sizing walk-in coolers, a competitive walk-in refrigerator cost and the product breadth that allows them flexibility in determining the walk-in solution that's right for them. Kolpak's commercial freezer, commercial cooler and industrial refrigeration system designs are unsurpassed in the industry.

Kolpak continues to lead with a wide range of energy-saving and environmentally-friendly products, features and manufacturing processes. Our units offer maximum cold holding performance with minimum environmental impact, all while saving the operator money on energy, operating, food and ownership costs.

 **Kolpak**

| Specified #1 in Cold Food Storage

Polar-Pak Walk-ins

Walk-in to convenience, unsurpassed quality and a host of standard features.

Polar-Pak coolers and freezers are made with the same rugged, high performance construction that has made Kolpak the leader in walk-in refrigeration. The Polar-Pak is constructed from 4" modular panels and 100% foamed in place urethane for superior insulating capabilities. The exterior and interior of top-quality galvalume metal offer an attractive and rugged finish. Polar-Pak also offers superior air circulation around the coils making it both economical and efficient to run.

Standard features

- Top-mount refrigeration is flush to the interior
- Indoor and outdoor applications
- Superior door construction to seal in cold, prevent condensation
- Posi-Loc panel fasteners for a perfect airtight fit
- Adjustable hinges and durable handle
- Interior safety release to prevent accidental entrapment
- Coved corners on floor panels for easier cleaning, greater sanitation
- 16 different model sizes in cooler and freezer offerings available to ship within 48 hours

Custom Engineered Walk-ins

Walk-in flexibility for all your custom needs.

Kolpak custom engineered boxes use all the components that have made our walk-ins famous for quality, flexibility, durability and energy efficiency. We can manufacture a walk-in in any size, shape, and material you could want. We manufacture panels in 4", 5", and 6" thick options and construction in both "soft nose" and Insulframe (high density rail) configurations.

Built-in efficiency

When you choose Kolpak Custom Engineered you can rest assured that we have not cut any corners when it comes to the performance of your walk-in.

Standard features

- Manufactured to any size and shape you need
- Cam locks ensure panels lock to a rigid air-tight seal
- Corner pieces are 1' x 1' for greater stability and durability
- Door hinges are adjustable to ensure a square air-tight seal for greater energy efficiency
- Lights are energy-saving and long lasting
- Doors feature a standard kick plate for greater durability
- Digital Thermometer standard
- Single and 3 phase pre-charged refrigeration systems in R404a refrigerant giving you an available 1 year parts and labor enhanced warranty

Five great reasons to walk-in to a **better** system

Kolpak offers flooring in a variety of finishes designed to fit your loads.

Best Lead Times

10 to 15 days – best in the industry

Floor Design Options

Kolpak matches your walk-in traffic with the correct load rating. A variety of finishes are available. Kolpak's patent-pending Structural Flooring is technically superior with panel design that can withstand rolling cart loads of up to 5,000 pounds or stationary loads of up to 15,000 pounds per square foot evenly distributed. Available as an option.

Adjustable Hinges allow for field adjustability to ensure a tight seal keeping your walk-in at the temperature it needs to be.

Adjustable hinges ensure years of trouble-free use and an air-tight seal

Air Shield

Designed to mount vertically, adjacent to the walk-in door on the interior wall surface, the Air Shield features an innovative air delivery system that channels a barrier of refrigerated air which flows horizontally across the interior side of the door opening. The Air Shield is automatically activated when the door is opened and shuts off when the door closes significantly reducing the amount of warm air infiltration into the refrigerated space (keeps the cold air in and the warm air out).

120 Series Refrigeration

The Kolpak 120 Refrigeration System makes installation and service easier. Choose from three system configurations - all units are now more energy efficient than ever. With the largest ambient range in the industry you can rest assured that on the hottest days of summer your walk-in will maintain to proper and safe temperature.

- Designed especially for foodservice applications.
- Largest ambient range in industry, -20°F to 120°F.
- Full line offering...self-contained or remote condensing; single units or racks; water or air-cooled.

Kolpak's optional Air Shield reduces air infiltration whenever the door is open

Walk-in Renovation Options

Bolt Over Doors

The doors on your walk-in take the most abuse over time. If your walk-in is in good shape, but the door has seen better days, we can have a door and frame manufactured to bolt directly over the existing opening. The original door plug is removed and all your electrical accessories are pulled through and mounted on a brand new door, complete with new hinges and door handles. It doesn't even have to be a Kolpak walk-in. We can retrofit any manufacturer's box.

Floor Overlay

Kolpak offers several ways to put new flooring into your walk-in. If your floor is delaminating, Kolpak can overlay the floor to give you a new floor. Our certified installers can also cut out your original floor and install a brand new "drop in" floor.

Panel Resurfacing

Our certified service network can re-surface, or "re-skin" the outside or inside of your walk-in to give you a new fresh look in your kitchen. One point of contact. Contact us for a certified factory inspection, measurement, and installation quote. This program is only available through Manitowoc KitchenCare.

ArcticFox™ Total Cooling Control

Electronic walk-in refrigeration control with the 120° ambient advantage

User interface displays temperature, system status, lights on/off, and alarm status for product safety.

NAFEM 2013

KITCHEN INNOVATIONS 2013 AWARD
NATIONAL RESTAURANT ASSOCIATION
RESTAURANTS, HOTELS, HOTEL SHOW

- **Tru-Dmnd™ defrost** initiates defrost cycles only when defrost is needed.
- Avoids up to 93% of standard system defrost cycles and up to 12% fewer cycles than a “smart defrost” control.
- **120° ambient refrigeration design** maximizes performance range on the hottest days.
- **Programmable light control** turns on the light when the door is opened and turns off at the desired time. *No more lights left on!*
- **Door ajar alarm.**
- User interface can be located remotely in a manager’s office.
- **CAT 5 cable connectivity** for ease of installation.
- **Diagnostic functionality** for tracking usage, temperature variations, door opening duration and more.
- Controls the door heater cycles for further energy savings.
- **Fewer defrost cycles** improves temperature stability in the box and a safer environment for the contents within.
- **Self-adjusting defrost cycles** means no need for seasonal adjustments.
- System pays for itself in less than two years*!

*overall savings will depend on refrigeration sizing

ArcticFox eliminates the need for other accessories and components including:

- Light switches
- Motion detectors
- Alarms
- Digital or dial thermometers
- Secondary refrigeration controls
- Defrost time clocks
- Fan delay switches
- Defrost termination switch

You've purchased the best walk-in available – keep it that way with Manitowoc KitchenCare.

Manitowoc KitchenCare helps service, maintain and protect your foodservice equipment and facility, throughout the lifecycle of your business. KitchenCare gives you a wide variety of options in caring for your equipment, your kitchen and even your entire facility, whether you own one restaurant or operate many. You'll feel a level of comfort you've rarely felt in a business relationship. Whether you're around the world or just around the corner our first responders are at the ready. Giving you peace of mind it will be right the first time.

A well performing kitchen doesn't just happen, it takes planning, maintenance and expert know-how. Manitowoc KitchenCare is all those things and more.

Every new piece of Manitowoc Foodservice equipment comes with KitchenCare and you choose the level of service that meets your operational needs from one restaurant to multiple units.

StarCare – Our network of Factory Authorized Servicers are factory trained and performance audited, with locations in over 130 countries to meet your warranty and lifetime service, installation, start up and planned maintenance needs. With genuine OEM parts certified for heavy-duty use, they keep your equipment running in the most demanding kitchens.

- Warranty and life time service
- Certified OEM parts
- Global parts inventory
- Performance audited

ExtraCare – Fringe benefits at your fingertips, ExtraCare offers all the little conveniences that someone who understands and cares about your operation provides.

- CareCode
- 24/7 Support
- Online/Mobile Product Information

LifeCare – The ultimate level of worry free protection and support for multi-unit operators. We work together to determine the right level of service for your units, then customize a program to manage your operation. Then you sit back and let us do the work.

- Install and Equipment Orientation
- Planned Maintenance
- KitchenConnect™ – Full facility monitoring and diagnostics
- MenuConnect – Automatically upload recipes and cooking procedures
